In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

3. The following is an examiner's statement of reasons for allowance: the prior art fails to show or suggest a jitter detecting circuit or method for detecting a jitter value of a signal which is converted into a digital signal from an analog signal input comprising at least an edge detector or step of discriminating signs of two signals derived from consecutive sampling points from the digitally converted input signal and outputting the two signals as first and second edge signals, respectively, if the signs are different from each other; a comparator or step of outputting a signal having a smaller absolute value among the first and second edge signals output from the edge detector; and an operating unit or step of dividing the absolute value output from the comparator by a sum of the absolute value of the first edge signal and that of the second edge signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
